Safety Manual Today – We Are Small Business ISNetworld® Compliance Specialists	105

This product was created by Safety Manual Today, a company of Cooper & Associates LLC. Cooper & Associates LLC is not affiliated with ISNetworld® in any fashion. ISNetworld® was not involved with this project in any way. Also the list of companies in this product was composed from online resources and may not be 100% complete.

Adding a Client to Your ISNetwork® Account

One benefit of an ISNetwork® subscription is that there are no extra fees if you decide to add additional clients into your ISN account. Once you have an ISNetwork® subscription, you can add as many clients as you like. Having one client in your ISN account will cost the same amount as having 50 clients in your ISN account.

Having clients added to your account can be difficult and ISNetwork® themselves don't facilitate this process. The clients themselves will need to login to ISNetwork® and make the connection between your two companies. For example, if you want to add Valero to your ISN account, somebody at Valero, and not ISNetwork®, would need to login to their ISNetwork® account, which is much different than your ISN account, and make the connection.

The hardest part of having clients added into an ISNetwork® account is finding the employee at your client's company that can make this connection.

Here are 3 different strategies to assist with this process:

Strategy 1

If you have a company contact at your potential client's company, start with them. Send them an email about making a connection in ISNetwork® between your two companies. Make sure to include your ISN account number (it's at the top of the screen when you login to your ISN account and it starts with "400-").

Strategy 2

If you don't know anybody at the company you would like to work for, try finding a contact via LinkedIn.com. Usually the employee that is in charge of making ISNetwork® connections works in Safety or Human Resources. Search for people in LinkedIn that work for your target client. Sort through the list and look for employees that work in Safety or Human Resources. Once you find a couple of employees that fit this description, send them a "connect" request. With a "connect" request, you are allowed to include a short note. Make sure to include a note that is similar to this:

"Hi (input person's name), we are trying to make a connection with (input client's company name) in our ISNetwork® account. Could you please point us in the right direction and tell us who at (clients company name) can assist us with this."

You may have to send out several "connect" request before you find someone that is willing to help.

Strategy 3

Ask fellow business owners that might already work for the client you are trying to add to your ISNetwork® account. They may have a contact person at your target client's company that can assist you with this. If you are a sub-contractor, ask the contractor for the name of the contact person of their client that assisted them with making the ISNetwork® connection between their two companies.

The hardest part of making a connection in your ISNetwork® account with your new client is finding the employee that works for your potential client that can make this connection happen. Persistence is the key here and spending an hour or two per week on this process can produce significant revenue for your company down the road.

Safety Manual Today – We Are Small Business

ISNetwork® Compliance Specialists

We Specialize In Helping Small Businesses Become ISNetwork® Compliant For The Lowest Price In The Industry

We understand that an ISNetwork® subscription is an expense to your company and just about the last thing you want, is to pay someone to complete your ISNetwork® account.

So we have focused on how to provide small businesses the ISNetwork® services they need for a fraction of the costs that other safety consultants charge. We are like the Wal-Mart of ISNetwork® services, we are inexpensive and we have everything you need.

And like Wal-Mart, we have been around a while. We have been providing ISNetwork® services for over 8 years. We are very fast and we are very good at what we do. We focus on helping small businesses because we are a small business and I understand the need to keep expenses down (like your ISNetwork® subscription) so you can focus on work that generates revenue for your businesses.

When you hire us you receive:

- Over 8 years of ISNetwork® experience. When you hire our safety consulting firm, I will personally complete your ISNetwork®, Browz or Avetta account. With my experience I have learned how to navigate ISNetwork® and other 3rd party accounts to get your company the highest grade possible.
- Editable safety manual. You will receive our safety manual in an editable MS Word format so that you can make additions and modifications to it through time. You will also receive the safety manual in PDF format which can be used to email to your clients upon their request.
- Your account will be 100% complete when we are done. With our services we will provide your company a safety manual that is guaranteed to pass review and we are going to complete 100% of your account so that when we are finished, there is absolutely nothing left to do.
- Our service is risk free. Your account will be 100% complete before we invoice your company.
- Guaranteed to pass review. Our safety manuals are guaranteed to be accepted by ISNetwork®, Avetta, Browz and any other third party compliance company.

If you are interested in our ISNetwork® services, send me a quick email
